# DISCRETION IS THE PERFECTION OF REASON

The more things remain discreet or minimal, the more they are interested. At Atelier Luxus, we even try to find mystery in things that seem to have none. This is why we believe the way people live can be directed by design and architecture advocating for the greatest simplicity.

Just as he does with his architectural research, Bruno Erpicum carried out a perfect exercise of erasure. Designing DoT, the ultimate minimal switch. Because everything starts with a DoT.
