

 ATELIER LUXUS

ATELIER LUXUS

For over 25 years, Atelier Luxus has been designing electrical appliances for the most demanding interiors. With the utmost determination to offer the extraordinary, the superlative, the best. Always.

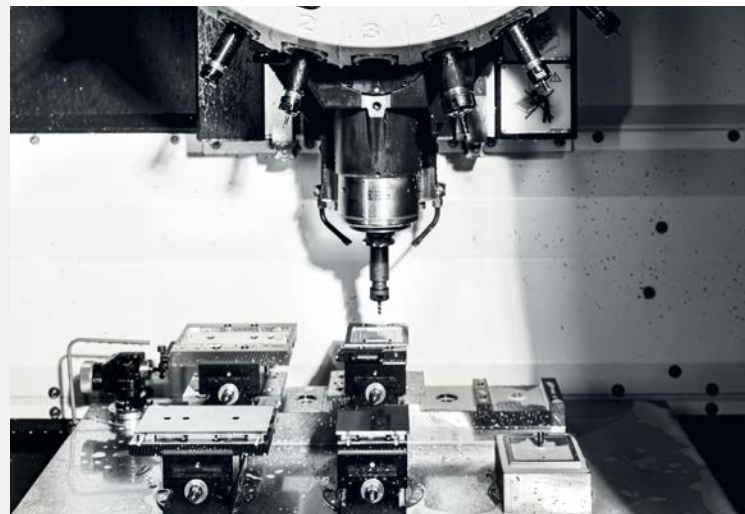

SAVOIR FAIRE

MATERIALS & PATINAS

Each Atelier Luxus product is produced from a single sheet of thick pure premium brass, the precious alloy made of copper and zinc.

PRECISION & CRAFTSMANSHIP

High precision techniques are used to create perfect assemblies, extremely refined details and unique products, which are the characteristics of the Luxus brand.

PATINES

Our collections are available in different patinas divided into 3 categories:

- Patinas A
- Patinas B
- Special finishes

The price of our products depends on the patina you choose.

Our surface treatments are carried out by hand, so slight variations in shade are possible and do not constitute a defect.

Our levers and buttons are always in the same finish as the front.

*Pictures may not correspond to the reality.

ENGRAVINGS

We offer two types of engraving: words and pictograms. All our faceplates and buttons (except the DoT buttons which are too small) can be engraved.

The engravings are by default the same finish as the faceplate, but can be left raw, in the colour of the material used to make the plate.

You will receive a drawing of the faceplate containing the future engraving to be signed and returned to us before the creation of the faceplates begins.

PICTOGRAM ENGRAVING

The pictogram should be simple and legible and may be engraved as a fill or outline.

ON

WORD ENGRAVING

One or more words can be engraved depending on the space available. The default font used is Arial Regular, minimum 11 points, and can be in lower or upper case.

MUR

BACKLIT ENGRAVING

Only available on request.

BESPOKE

Designed to meet the function and accentuate the style of the interior. Each design is developed to favor the continuity of the experience.

The Bespoke service is for example:

- The custom-made manufacture of a cover plate for your own thermostats,
- The tailor-made manufacture of a Niko home control product, Crestron, Lutron.
- simply by a specific engraving
- a particular arrangement of buttons / levers or electrical equipment on the front faceplate
- the manufacture of buttons or levers having the shape and/or finish of your choice
- the manufacture of a floor box or a custom-made lighting
- making small decorative elements for your interior

Technology

- Compatible with international electrical standards
- Push-button with potential-free contacts compatible with any systems from 0-230V
- KNX, Crestron...

Many mechanisms available (USB, HDMI, RJ, thermostat, sensor, etc.)
